

# Encore® Acclaim®

The Encore® Acclaim® is Ansell's premier powder-free surgical glove made from natural rubber latex. The glove's thickness allows for a comfortable fit and excellent tactile sensitivity during surgical procedures in a single- or double-gloving environment. Its smooth finish provides worry-free instrument and suture control, and its low allergen levels help reduce the risk of latex sensitization in healthcare workers and patients.

## Safety & Protection

### Infection Control

**Viral Penetration.** Although not an FDA requirement, Ansell's premium line of surgical gloves is tested to ensure protection against viral permeation. Encore® has been tested and passed the viral penetration according to ASTM F1671-97a.

**Cuff Roll-Down.** This glove has Ansell's patent-pending SureFit Technology™, which provides surgeons, nurses and other healthcare professionals with superior barrier protection during operating room procedures.

**Bone Cement.** As long as the preparation and use directions on the bone cement are followed, this glove provides a protective barrier for handling mixed bone-cement product.

**Embryo Use.** This glove is appropriate and accepted for embryo use.

### Skin Protection

**Low Protein Content.** This glove contains 50 µg/g or less of water/extractable protein per gram.

Caution: Safe use of these gloves by latex-sensitized individuals has not been established.

## Comfort & Fit

### Donning

**Alcohol Resistant.** Ansell's proprietary polyurethane inner coating will not break down. It is resistant to alcohol-based hand disinfectants and adds another layer of safety between your skin and the latex.

**Damp-Hand Donnability.** Polymer coating for dry- and damp-hand donnability.

**Double Donnability.** This glove can be used as an under glove or an over glove depending upon the user's preference.

### Hand Fatigue

**Shape of Glove/Former.** Designed with Anatomic Curved Former for a more natural fit and less fatigue. This exclusive Ansell former is the result of a staff dedicated to the development and continuous improvement of formers.

**Stretchability (Modulus).** Because this glove is latex, wearers experience a more secure fit that provides greater comfort without being baggy.

## Tactile Sensitivity

**Dependability.** The thickness of these gloves is optimized for the best balance of protection and tactile sensitivity, all while allowing for a comfortable fit during the majority of surgical procedures.

## Grip

**Application Driven.** Anti-slip smooth finish prevents slip.
