

# MICRO-TOUCH® Affinity®

Micro-Touch® Affinity® examination gloves provide the fit, comfort, tactile sensitivity and stretchability of natural rubber latex without the risks associated with latex or glove powder complications. A polymer coating provides excellent donnability for this polychloroprene glove.

## Safety & Protection

### Infection Control

**Allergy Concerns.** This examination glove contains 100% polychloroprene (neoprene). It does not contain natural rubber latex thus addressing Type I (latex) allergy concerns.

**Sterilization.** This is a non-sterile examination glove.

**Quality Benchmarks.** Meets or exceeds ASTM examination glove standards. Manufactured within the quality guidelines of ISO 13485:2003, ISO 9001:2008 and FDA-QSR. FDA approved for handling chemotherapy drugs.<sup>1</sup>

**Cuff.** Inverted, 9.5" beaded cuff.

**Resistance.** Neoprene film is a strong material with good puncture and chemical resistance. It is the preferred barrier when handling the lipophilic form of some hazardous drugs.

This glove is tested for use with the following 17 chemotherapy drugs: Carmustine, Cisplatin, Doxorubicin Hydrochloride, Mitomycin, Melphalan, Carboplatin, Etoposide, Paclitaxel, 5-Fluorouracil, Daunorubicin Hydrochloride, Idarubicin, Bleomycin Sulfate, ThioTEPA, Cyclophosphamide, Mitoxantrone, Ifosfamide and Cytarabine Hydrochloride.

### Skin Protection

**Powder-Free.** To help eliminate powder-related complications and sensitivity.

## Comfort & Fit

### Hand Fatigue

**Stretchability (Modulus).** Neoprene's elasticity is close to that of latex, with very good memory, making the fit, feel and comfort level superior for a synthetic glove.

**Shape of Glove/Former.** Ambidextrous.

## Tactile Sensitivity

**Dependability.** Neoprene provides barrier protection and sensitivity similar to that of latex.

**Memory.** Neoprene has very high elasticity and memory, allowing the film to retain its original shape.

## Grip

**Application Driven.** The textured fingertips of the glove provide extra protection for wet or dry grip and against slippage.

## Ordering Information

SIZE	Product Number
X-Small	3770
Small	3771
Medium	3772
Large	3773
X-Large	3774

100 Gloves/Dispenser Box – 10 Boxes/Case

1. Specific chemical resistance data available upon request: 1-800-952-9916 (U.S.A. only). Gloves used for protection against chemotherapy drugs must be selected specifically for the type of chemicals used. Review material safety data sheets for the chemicals being used to determine the required level of protection.
