

# No Powder™

**No Powder™** surgical gloves are made from latex and are powder-free. The gloves have a straight, reinforced cuff for extra coverage and protection on the forearm and a textured finish for superior grip and handling of instruments and sutures.

## Safety & Protection

### Infection Control

**Viral Penetration.** Meets or exceeds ASTM surgical glove standards. Manufactured to quality management systems of ISO 9001, ISO 13485, FDA-QSR, and CE Certification.

**Cuff Roll-Down.** Straight, reinforced cuff for extra coverage and protection on the forearm.

**Bone Cement.** Always follow manufacturers' instructions when mixing and handling bone cement. This glove provides a protective barrier while handling and mixing bone cement product. Double gloving is the usual practice for handling bone cement.

### Skin Protection

**Low Protein Content.** This glove contains 50 µg/g or less of water/extractable protein per gram. Caution: Safe use of these gloves by latex-sensitized individuals has not been established.

## Comfort & Fit

### Donning

**Alcohol Resistant.** Latex provides an adequate barrier for splash protection and/or short duration of alcohol contact.

**Double Donnability.** The proprietary polymer coating provides for ease of double donning of this glove.

### Hand Fatigue

**Shape of Glove/Former.** Straight finger former.

**Stretchability (Modulus).** Excellent comfort and fit due to its high elasticity and memory.

## Tactile Sensitivity

**Dependability.** Very strong and durable with excellent tensile strength.

## Grip

**Application Driven.** Textured finish for reliable grip.

*Caution: This product contains natural rubber latex, which may cause allergic reactions.*

NO POWDER™
